

# RAZOR 556™

## DEDICATED SUPPRESSION, REDUCED BLOWBACK.

The Razor556™ is an impeccable choice for lightweight, affordable durability. Rugged's dedicated 5.56 suppressor has decreased blowback, recoil, and flash, while clocking in at 12% lighter than our Razor762™. This suppressor is a turnkey, out-of-the-box solution for 5.56 and .223 rifles that includes a 1/2x28 M2 brake and an enhanced 5.56 end cap.

### TOP FEATURES

#### Accuracy Proven

We've sent thousands of rounds through our designs to ensure exactitude. Our vetting process gives our suppressors a proven accuracy and provides you with a repeatable zero shift when attaching/detaching your suppressor.

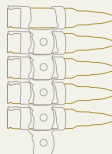

#### Reduced Gas Blowback

Say goodbye to a face full of gas. The Razor556 is designed to have reduced gas blowback for your semi-auto and full-auto platforms.

#### Dual Taper Locking System™

Our quick detach mounts feature 2 tapers. The front taper provides a concentric lock up and protects the threads from carbon build up. The rear taper prevents the suppressor from loosening during firing.

#### Belt Fed Rated®

The Razor556 is machined from top of the line materials to not only last a lifetime, but withstand any rate of fire. The Razor556 is Belt Fed Rated® with no barrel length restrictions. Because we believe your gear shouldn't be what's holding you back.

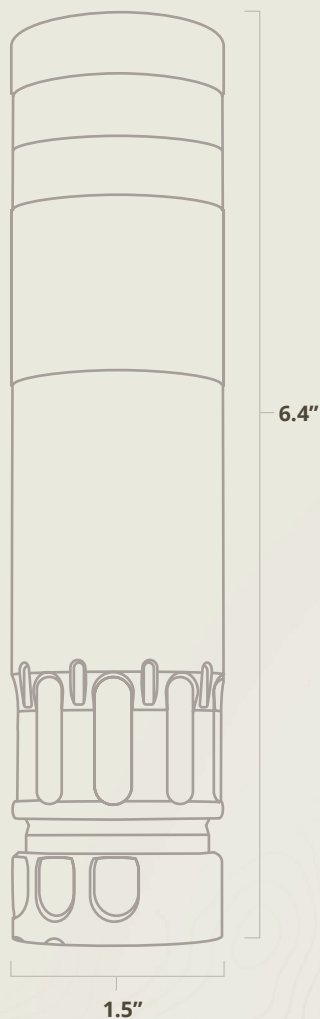

**UNCONDITIONAL  
LIFETIME  
WARRANTY**

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
