

SUB⁹TM

SUPERIOR SILENCE FOR SUBGUN PLATFORMS

Designed for full-auto durability and tuned specifically for 9mm PCCs and SMG platforms, the Sub9TM delivers exceptional suppression. The Sub9 keeps your setup compact and impressively quiet.

The Sub9TM is fully compatible with HK Spec 3 Lugs and HUB 1.375x24 systems, giving you flexibility across platforms.

TOP FEATURES

Subgun Optimized

The Sub9TM utilizes coaxial chambers in order to be as quiet as possible for subgun and pistol caliber carbines. At 6.8" the Sub9TM provides a compact package ideal for staying short and quiet.

Rugged Universal 3 Lug Mount

Utilizes a taper lock for a stronger and more concentric lock up than traditional spring style 3 Lug Mounts. The Universal 3 Lug Mount is compatible with all HK Spec 3 Lug Adapters on the market.

HUB/Universally Threaded

The Sub9TM is threaded in 1.375x24 making it compatible with our Rugged Universal Mount, along with other mounting systems on the market.

Strategically Placed Engraving

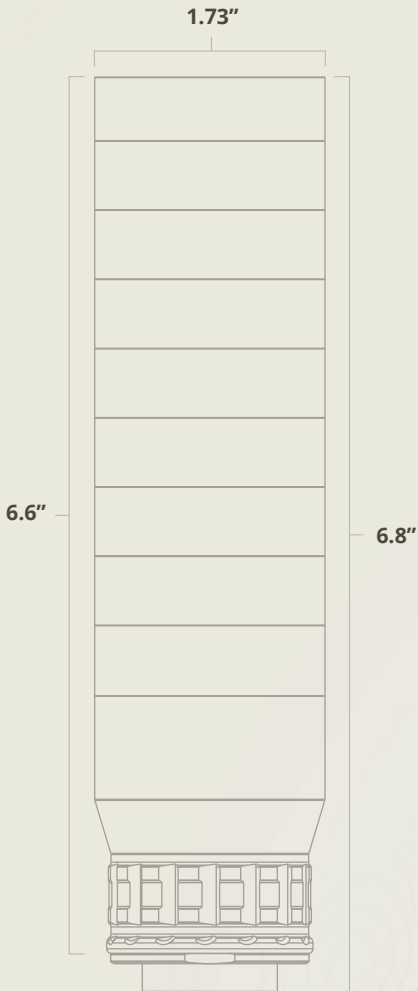

We strategically place the serialized engraving over the thickest Stainless Steel cross section of the suppressor. This allows fast and easy repairs should the suppressor become damaged beyond repair.

No matter the problem or how it occurred we will work with you to find a solution and fix it. To prove it, we have no legal print and our average turn around time is within 16 business hours.
